### What is Specificity?

가 CSS 가 가

(specificity)

(global selector) (\*) 가 , ID !

#### Note:

CSS

가

### **Specificity Hierarchy**

(Specificity Hierarchy) 가 가

Inline styles -

: <h1 style="color: #ffffff;">.

**IDs** - ID #navbar

Classes, attributes and pseudo-classes

- .classes, [attributes] :hover, :focus (pseudo-classes)가

**Elements and pseudo-elements** 

- h1, div, :before :after (pseudo-elements)가

## **How to Calculate Specificity?**

0 , 1000 가 ID 100 가 , 1000 가 , 10 가 , 10 가 , 10 가 .

```
A: %h1%%
B: %#content h1%
C: %%<div id="content"><h1 style="color: #ffffff">Heading</h1></div>%
Α
                  (h1)가
         : 1
                               Α
                                           1
                           가
В
         : 1
                ID
                    1
                                     В
                                                 101
C
         : inline styling
                           , C
                                       1000
1 < 101 < 1000
                                                         가
                               (C)
                                                                      (C)가
```

### **Specificity Rules**
