HTML Images Syntax

HTML

 , , (closing tag)가

 2

- src - (path)
- alt -

Syntax(,)

```

```

The src Attribute

src (URL)

Note:

가 가

, 가

가 , alt 가

The alt Attribute

The alt attribute is used to describe the image. It is placed inside the `` tag, after the `src` attribute, and is enclosed in double quotes.

If a browser cannot find the image, it will display the alternate text:

Tip:

Use the alt attribute to describe the image for screen readers. This is important for accessibility.

Image Size - Width and Height

The `width` and `height` attributes are used to specify the size of the image. They can be specified in pixels or as a percentage of the page width.

```
<img src = "img_girl.jpg" alt="Girl in a jacket" style="width:500px; height:600px;">
```

The `width` and `height` attributes can also be used to specify the size of the image in pixels.

```

```

The `width` and `height` attributes can also be used to specify the size of the image in pixels.

Note:

Use the alt attribute to describe the image for screen readers. This is important for accessibility.

Width and Height, or Style?

The `width`, `height`, and `style` attributes are used to specify the size of the image. The `style` attribute is used to specify the size of the image in pixels.

```
/* This style sets the width of all images to 100%: */ img { width: 100%; }
```

Width/Height Attribute or Style?

The first image uses the width attribute (set to 128 pixels), but the style in the head section overrides it, and sets the width to 100%;

The second image uses the style attribute to set the width to 128 pixels, this will not be overridden by the style in the head section:

Images in Another Folder

가 , src .

```

```

Images on Another Server/Website

가 .

가 , src (an absolute (full) URL) .

```

```

Note on external images

가 .

Animated Images

HTML GIF .

```

```
