```java
public void calDateBetweenAandB()
{
    String date1 = "2016-09-21";
    String date2 = "2016-09-10";

    try{ // String Type  Date Type

        SimpleDateFormat format = new SimpleDateFormat("yyyy-mm-dd");
        // date1, date2        parse()        Date           .
        Date FirstDate = format.parse(date1);
        Date SecondDate = format.parse(date2);

        // Date                                    long type

        //         -950400000. long type     return       .
        long calDate = FirstDate.getTime() - SecondDate.getTime();

        // Date.getTime()                  1970   00:00:00

        //     24*60*60*1000(              )                    .
        long calDateDays = calDate / ( 24*60*60*1000);

        calDateDays = Math.abs(calDateDays);

        System.out.println("                  :"+calDateDays);
        }
        catch(ParseException e)
        {
            //
        }
}
```
