 */
public class EvaluInfoV0 extends EvaluV0 implements Serializable
```

```
/**
 * Returns an Image object that can then be painted on the screen.
 * The url argument must specify an absolute {@link URL}. The name
 * argument is a specifier that is relative to the url argument.
 * <p>
 * This method always returns immediately, whether or not the
 * image exists. When this applet attempts to draw the image on
 * the screen, the data will be loaded. The graphics primitives
 * that draw the image will incrementally paint on the screen.
 *
 * @param url an absolute URL giving the base location of the image
 * @param name the location of the image, relative to the url argument
 * @return the image at the specified URL
 * @see Image
 */
public Class
```

method comment

```

/**
 *   가
 *   @param EvaluStatV0
 *   @return EvaluStatV0
 *   @exception Exception
 *   @author
 *   @since 2020.03.17
 */

```

Attribute comment

```

/**      */

```
