[JavaScript Arrow Function](#)

(Arrow functions) ES6

Before

```
let hello;

hello = function () {
  return "Hello World!";
}

document.getElementById("demo").innerHTML = hello();
```

With Arrow Function

```
let hello;

hello = () => {
  return "Hello World!";
}

document.getElementById("demo").innerHTML = hello();
```

(Arrow Function) 가 가 ! , return

Arrow Functions Return Value by Default

```
let hello;  
  
hello = () => "Hello World!";  
  
document.getElementById("demo").innerHTML = hello();
```

Note: 이 코드는 브라우저 콘솔에서 실행하면 "Hello World!"가 출력됩니다.
