- `console.log()`

Using innerHTML

HTML JavaScript `document.getElementById(id)` .

id HTML . `innerHTML` HTML :

My First Web page

My First Paragraph

HTML innerHTML HTML .

Using document.write()

document.write()   .

My First Web Page

My First Paragraph

Never call document.write after the documnt has finishd loading. It will overwrite the whole documnt. document.write()   ,
.

**HTML   document.write( )   ,   HTML
.

My First Web Page

My First Paragraph

Try it!

documnt.write( )   .

Using window.alert( )

alert   .

My First Web Page

My First paragraph

window   .

window   (global scope object)   .
(variables),   (properties),   (methods)   window

```
window                                        .
```

My First Web Page

My First paragraph

Using console.log()

```
console.log()                                        .
```

Activate Debugging

F12 on your keyboard will activate debugging.

Then select "Console" in the debugger menu.

Then click Run again.

JavaScript Print

```
                                        .
window.print( )  .
        .
```

The window.print() Method

Click the button to print the currnt page

Print this page
