JavaScript Statements

A **JavaScript program** is a list of **statements** to be executed by a computer.

JavaScript Programs

JavaScript programs are written in text files. Each program consists of one or more statements. A statement is an instruction that the computer can execute. Statements are separated by semicolons. A program is enclosed in a pair of angle brackets. The following is an example of a JavaScript program:

```
<script>
// statements
</script>
```

JavaScript programs are embedded in HTML documents. The following is an example of an HTML document with a JavaScript program:

JavaScript Statements

JavaScript statements are separated by semicolons. The following are the basic components of JavaScript statements:

- (Values),
- (Operators),
- (Expressions),
- (Keywords)
- (Comments).

Example: "Hello Dolly" id = "demo" HTML

JavaScript Statements

In HTML, JavaScript statements are executed by the browser.
