JavaScript Statements

A **JavaScript program** is a list of **statements** to be executed by a computer.

JavaScript Programs

JavaScript programs are written in text files. Each line of a JavaScript program is a **statement**. A statement is an instruction that the computer can execute. Statements are separated by semicolons (;). A JavaScript program can contain one or more statements.

JavaScript programs are embedded in HTML documents. The following is an example of a JavaScript program embedded in an HTML document:

JavaScript Statements

JavaScript statements are separated by semicolons (;). A JavaScript statement can be a **value**, an **operator**, an **expression**, a **keyword**, or a **comment**.

For example, the following is a JavaScript statement:

```
document.getElementById("Hello Dolly").innerHTML = "id = \"demo\"";
```

The statement above is an **HTML** statement.

JavaScript Statements

In HTML, JavaScript statements are executed by the browser.
