jQuery .data()

Store arbitrary data associated with the matched elements

,

or return the value at the named data store for the first element in the set of matched elements.

.

```
.data(key, value)
```

```
$( "body" ).data( "foo", 52 );
$( "body" ).data( "bar", { isManual: true} );
$( "body" ).data( { baz: [ 1, 2, 3] } );
$( "body" ).data( "foo" );   // 52
$( "body" ).data();  // { foo: 52, bar: { isManual: true }, bar: [ 1, 2 ,3 ]
}
```

Using the data() method to update data does not affect attributes in the DOM. To set a data-*
attribute value, use attr.
data() DOM . **data-***
attr .
