• "slow", "fast"

```
animate(
250px left
<div>
);
```

```
$(document).ready(function () {
  $("button").click(function () {
    $("div").animate({ left: '250px' });
  });
});
```

```
! , CSS 가 relative, fixed absolute
```

jQuery animate() - Manipulate Multiple Properties

```
$(document).ready(function () {  
  $("button").click(function () {  
    $("div").animate({  
      left: '250px',  
      opacity: '0.5',  
      height: '150px',  
      width: '150px'  
    });  
  });  
});
```

animate()

CSS

?

, ! 가 :
padding-left animate() paddingLeft, margin-right (camel-case) marginRight

jQuery animate() - Using Relative Values

relative ().
+ = -=

```
$(document).ready(function () {  
  $("button").click(function () {
```

```

    $("div").animate({
      left: '250px',
      height: '+=150px',
      width: '+=150px'
    });
  });
});

```

jQuery animate() - Using Pre-defined Values

“show”, “hide” “toggle”

```

$(document).ready(function () {
  $("button").click(function () {
    $("div").animate({
      height: 'toggle'
    });
  });
});

```

jQuery animate() - Uses Queue Functionality

, jQuery _____(queue functionality)

“ ” animate() , jQuery

1

```

$(document).ready(function () {
  $("button").click(function () {
    var div = $("div");
    div.animate({ height: '300px', opacity: '0.4' }, "slow");
    div.animate({ width: '300px', opacity: '0.8' }, "slow");
    div.animate({ height: '100px', opacity: '0.4' }, "slow");
    div.animate({ width: '100px', opacity: '0.8' }, "slow");
  });
});

```

<div>

2

```
$(document).ready(function () {  
  $("button").click(function () {  
    var div = $("div");  
    div.animate({ left: '100px' }, "slow");  
    div.animate({ fontSize: '3em' }, "slow");  
  });  
});
```
