## Source of the article

[jQuery Traversing - Descendants](#)

jQuery DOM  
 (child), (grandchild), (great-grandchild)

## Traversing Down the DOM Tree

DOM 가 jQuery

- child()
- find()

## jQuery children() Method

children()  
 DOM  
 <div>

```
$(document).ready(function () {
  $("div").children().css({ "color": "blue", "border": "2px solid red"
});
})
```

<div> "first" 가 <p>

```
$(document).ready(function () {  
    $("div").children("p.first").css({ "color": "blue", "border": "2px  
solid red" });  
});
```

## jQuery find() Method

find()

<div> <span>

```
<script>  
$(document).ready(function () {  
    $("div").find("span").css({ "color": "red", "border": "2px solid red"  
});  
});
```

<div>

```
$(document).ready(function () {  
    $("div").find("*").css({ "color": "red", "border": "2px solid red" });  
});
```
