5		 <p>The diagram is an Entity Relationship Diagram (ERD) for an Order System. It features several entities represented as rectangles with their attributes listed below them. Key entities include: <ul style="list-style-type: none"> Customer: Attributes include Name, Address, City, Postal Code, Phone, Email, and Age. Order: Attributes include Order ID, Product ID, Quantity, Price, Status, and Order Date. Product: Attributes include Product ID, Name, Price, Category, and Stock. Supplier: Attributes include Supplier ID, Name, Address, City, Postal Code, Phone, and Email. Inventory: Attributes include Product ID, Supplier ID, Quantity, and Price. Category: Attributes include Category ID, Name, and Parent Category. Relationships are shown as lines connecting entities, with crow's foot notation symbols indicating cardinalities and roles. For example, a Customer places an Order (1:M), and an Order consists of many Products (1:M). A Supplier provides many Products (1:M), and a Product is associated with many Suppliers (1:M). There are also self-referencing relationships on Order and Product entities.</p>	Entity Relationship Diagram(ERD)
