Sass Nested Rules

Sass CSS DRY(Don't Repeat Yourself,)
 DRY() 가 .

CSS reset file, , , , Sass .

Sass Importing Files

CSS 가 Sass @import (directive) .

@import .

CSS "@import" ; 가 HTTP

Sass "@import" CSS ; 가 HTTP

!

Sass Import Syntax

```
@import filename;
```

Tip:

가 . Sass .sass .scss 가

CSS 가 .@import (mixins) , (the main file)

가

```

@import "variables";
@import "colors";
@import "reset";

```

: "reset.scss" reset 가 .

SCSS Syntax (reset.scss)

```

html,
body,
ul,
ol {
  margin: 0;
  padding: 0;
}

```

"reset.scss" "standard.scss"

, 가 : @import 가 ;

SCSS Syntax (standard.scss):

```

@import "reset";

body {
  font-family: Helvetica, sans-serif;
  font-size: 18px;
  color: red;
}

```

, "standard.css" , CSS .

CSS output (mystyle.css)

```

html, body, ul, ol {
  margin: 0;
}

```

```
padding: 0;
}

body {
  font-family: Helvetica, sans-serif;
  font-size: 18px;
  color: red;
}
```

Sass Partials

Sass partials are files that end in `.scss` and are used to organize your CSS. They are imported into a main file using the `@import` directive. For example, you can import a partial named `colors` into a file named `main.scss` like this:

```
@import "colors";
```

The partial `colors` can then contain variables and styles that are shared across your project.

Sass Partial Syntax

```
_filename;
```

For example, to import a partial named `_colors.scss` into a file named `colors.css`, you would write:

```
@import "_colors.scss";
```

"_colors.scss":

```
$myPink: #EE82EE;
$myBlue: #4169E1;
$myGreen: #8FBC8F;
```

partial `_colors.scss` 가

```
@import "colors";

body {
  font-family: Helvetica, sans-serif;
  font-size: 18px;
}
```

```
colors: $myBlue;
```
