# Mybatis( ) ,

## Mybatis Tip

- DBCP

<property name="initialSize" value="0"/>

```
<property name="maxActive" value="8"/>
<property name="maxIdle" value="8"/>
<property name="minIdle" value="0"/>
<property name="maxWait" value="-1"/>
```

initialSize:                                                      .
        0        .
maxActive:                                      .                              8
        .
                                maxWait                    ,
                .

maxIdle:                                                  .
        .              8        .
maxActive    10      , maxIdle    8        10                                  .

, maxIdle            8                                    .
        .                                  8                                  .
minIdle:                                                          .              0        .
                                                                  .
                                    ,                                          .
                    minIdle                                    minIdle                    .
maxWait -                                                              .
                                            . - 1                              .
- 1          .
