- [Spring batch Annotation](#)

Batch

4. [Spring batch, boot 연동 및 처리 과정.](#)

Troubleshooting

1. Run As 실행시에 Spring Boot App 이 없을 경우 구동 방법

Steps: 1. go to Run->Run configuration -> Maven Build -> New configuration
Steps: 2. set base directory of you project ie. \${workspace_loc}/\${프로젝트명}}
Steps: 3. set goal spring-boot:run
Steps: 4. Run project from Run->\${프로젝트명}}

[How to run Spring Boot web application in Eclipse itself?](#)

2. pom.xml Error 표시: Plugin execution not covered by lifecycle configuration

In Eclipse Luna 4.4.0, you can chose to ignore this error in preferences

Window > Preferences > Maven > Errors/Warnings > Plugin execution not covered by lifecycle configuration. Select Ignore / Warning / Error as you wish. Also, in the quick fix (Ctrl + 1) for this error, it gives an option to mark goal as ignored in Eclipse build in Eclipse preferences (experimental) This is a cleaner way, as it doesn't modify your pom.xml. You will need to do a Maven > Update project to fix the same error in any other project as well.
