putty

```
, Change Settings...
1.
                         putty
                                            bar
2.
       Category
                   Window > Appearance
                                                   Font settings
                                                                 Change...
                                                                  가 )
                             , :11 (
                 SELECTBOX
4.
5.
                   Apply
     , putty,
```
